Mission

Our mission is to develop sustainable solutions for the transport sector at local, regional, national and international scale for industrialised as well as for developing countries.

Globalisation and economic growth entail increasing transport demands. An important challenge is to satisfy the mobility needs of society and the economy without overburdening the environment, public finances and the population.

In order to achieve this, TCP International aims to increase the effectiveness, safety and efficiency of transport systems by developing innovative strategies and creative, tailor-made solutions.

In a complex world, TCP International is your independent transport advisor, providing clear, feasible and practical solutions. We strive to realise your goals in a timely and efficient manner.

Profile

TCP International provides a full range of state-of-the-art transport consulting services in Germany, Europe and world wide:

- Our senior experts have been trusted partners to national, regional and local government agencies, multilateral institutions, and commercial industries for more than 20 years on average.
- Our clients rely on our highlevel technical and managerial expertise to successfully develop, design, plan and implement their transport projects.
- Our teams work closely with our clients, to develop innovative and customised solutions, based on the latest research, tools and methods.
- Our focus is on sustainability by taking into account the natural environment, financial and economic frameworks and social impacts. Our clients benefit from lasting results.

Entire Project Cycle

Our interdisciplinary team has expertise in all consultancy services covering the entire project cycle:

- **Programming**
Strategies and policies
- **Project identification**
(Pre-)feasibility studies, investment appraisals, project development
- **Planning, design and tendering**
Planning, design and specifications, terms of reference, tender documents
- **Implementation**
Project management, monitoring, quality and change management
- **Evaluation**
Audits, impact assessment
